## **DETAILED ACTION**

### ***Restriction/Election***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-9,13,17-19, and 21, drawn to polynucleotides.

Group II, claim(s) 10-12, and 17, drawn to polypeptides.

Group III, claim(s) 14-16, drawn to methods of screening for compounds that modulate the activity of a ZGGBP1 polypeptide.

Group IV, claim(s) 20, drawn to antibodies.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The technical feature linking the three groups is a ZGGBP1 protein, homologue or fragment thereof. However, the specification discloses at the paragraph bridging pages 1 and 2 that ZGGBP1 is homologous to ned-4 (Schild et al 1996). Because ned-4 is considered to be a homologue of ZGGBP1, the technical feature linking the claims does not constitute a contribution over the prior art, and it cannot be a special technical feature under PCT Rules 13.1 and 13.2. Further, because the claims embrace polypeptides which

Art Unit: 1632

comprise any fragment of SEQ ID NO:2, and polynucleotides encoding those polypeptides, the linking technical feature is anticipated by any polypeptide which shares any single amino acid in common with SEQ ID NO:2, or by polynucleotides which encode such polypeptides.

The special technical feature of group I is considered to be polynucleotides that comprise a sequence encoding the polypeptide of SEQ ID NO:2, any homologue of SEQ ID NO:2, or any fragment of SEQ ID NO:2.

The special technical feature of group II is considered to be the polypeptide of SEQ ID NO:2, any homologue of SEQ ID NO:2, or any fragment of SEQ ID NO:2.

The special technical feature of group I is considered to be a method of screening for modulators of the activity of the polypeptide of SEQ ID NO:2, any homologue of SEQ ID NO:2, or any fragment of SEQ ID NO:2.

The special technical feature of group I is considered to be antibodies which are specific for the polypeptide of SEQ ID NO:2, any homologue of SEQ ID NO:2, or any fragment of SEQ ID NO:2.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any

Art Unit: 1632

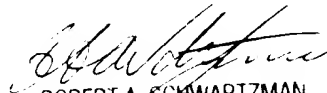

amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
